

The Future of the Energy Harvesting Ecosystem

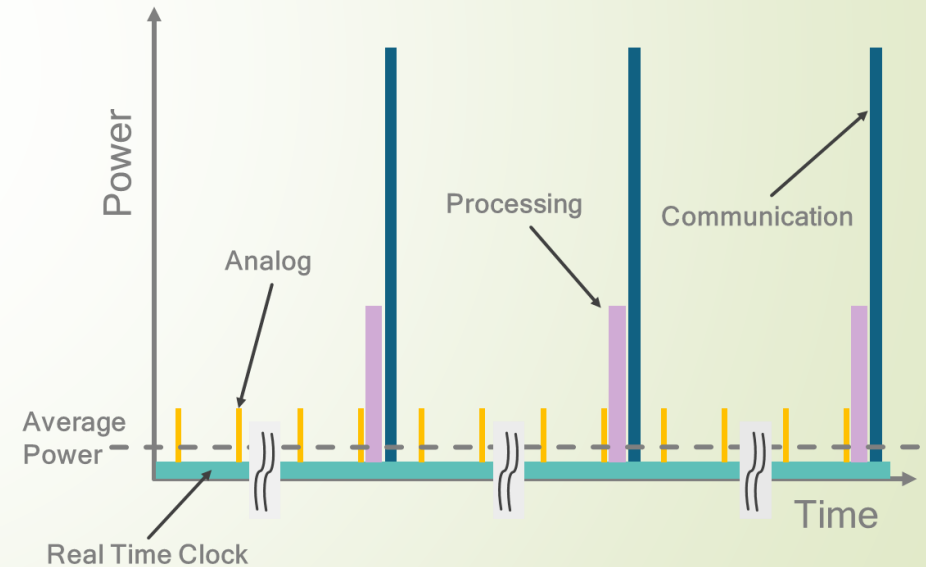

Francesco Carobolante

@EnerHarv 2018

Cork, Ireland, May 31, 2018

From “Power Management” to “Energy Management”

- ▶ Enabling ubiquitous intelligence requires a fundamental re-thinking of Electronic Systems
- ▶ From Efficient Energy Supply to Efficient Energy Utilization

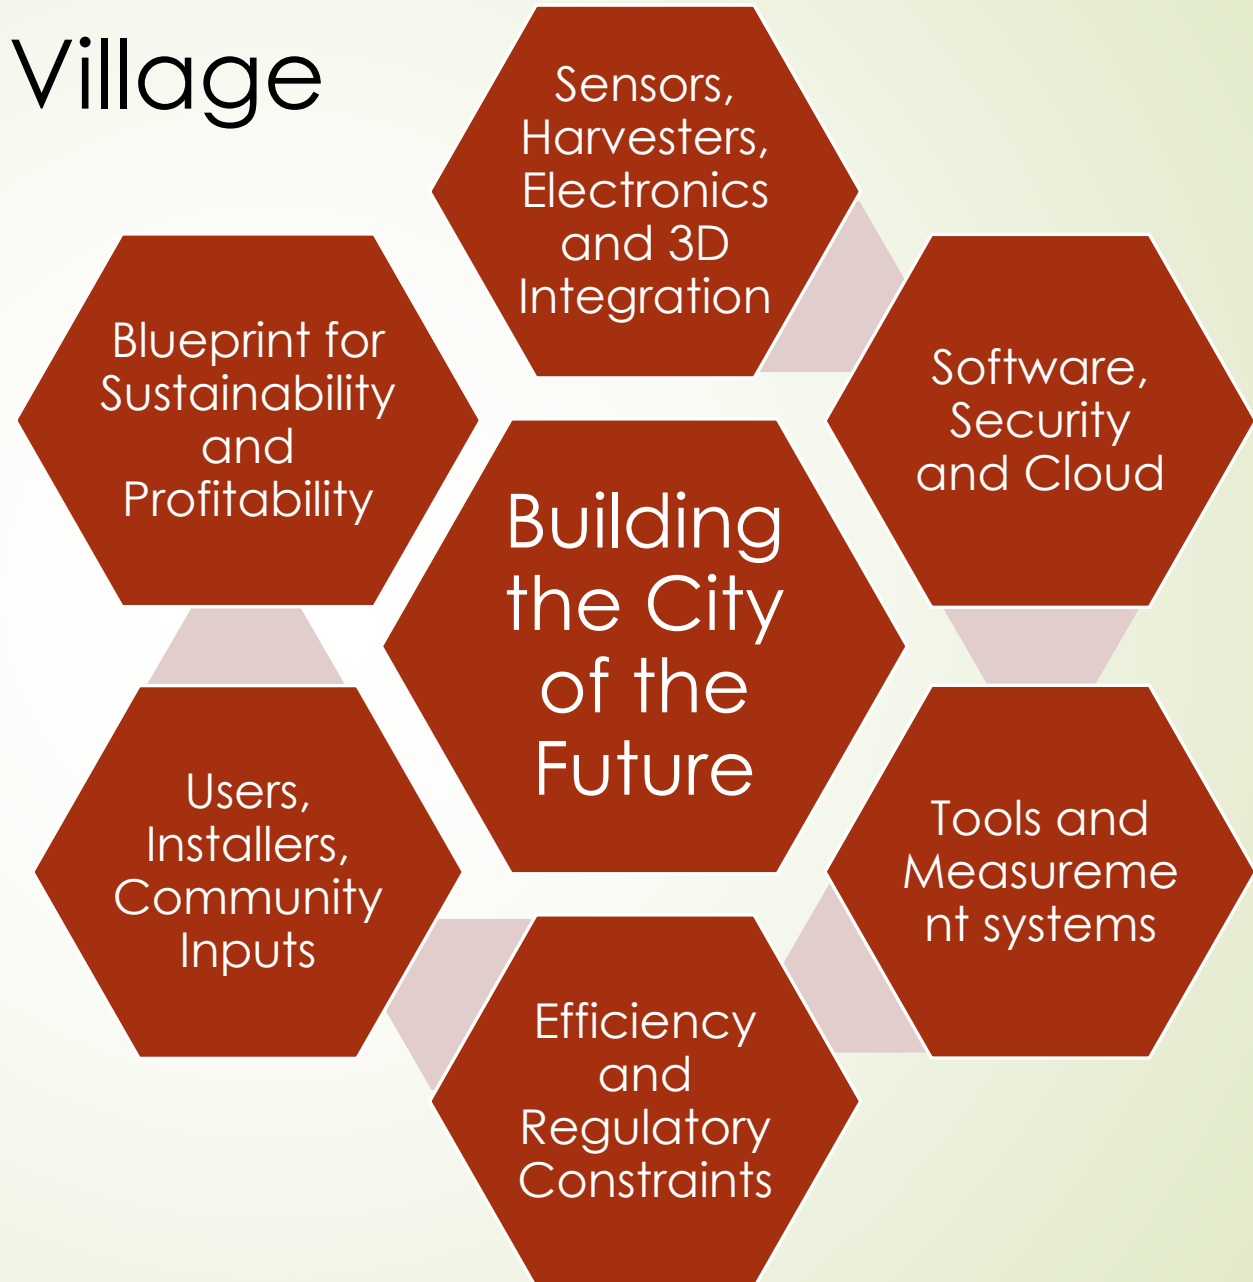

Enabling the Vision of IoT

- ▶ Enabling ubiquitous intelligence requires a fundamental re-thinking of Electronic Systems
- ▶ From “Power Management” to “Energy Management”
- ▶ No single “Law” drives such achievement
- ▶ Learning “Sustainability” from nature
- ▶ We are “re-building” our cities: a multiplicity of technologies and tools are required
- ▶ Imagining how all of this comes together in a functional environment and asking all of the questions early on

It Takes a Village

Your Conclusions...

- What new perspectives have we learned from the last few days?
 - What are the missing pieces in the puzzle to achieve market success?
 - What else would you like to know?
